## II. Return as of February, 2018

The return in US dollars was -0.71% in the month. This was due to the performance of Money Market and Sovereign Bonds, -0,83%, Sovereign Inflation Linked Bonds, -0.83%, and Equities, -4.21%. The returns of the Money Market and Sovereign Bonds' and Sovereign Inflation Linked Bonds' portfolios were explained by return in local currency and the appreciation versus the US dollar of the currencies in which these portfolios are invested. The Equities portfolio had a negative return, mainly explained by the return in local currency and to a lesser extent to the appreciation of the currencies other than dollar. The monthly return of the fund in pesos was -3,22%. Finally, annualized return since inception was 2.70% in US dollars and 3.54% in pesos.

Returns <sup>(a)</sup>	Month	Last 3 Months	Year to Date	Last 12 Months	Last 3 Years (Annualized)	Since Inception (Annualized) <sup>(b)</sup>

<sup>(a)</sup> Time Weighted Return (it's calculated as the growth rate of the funds that were invested throughout the period).

<sup>(b)</sup> It's calculated from March 31, 2007, when the performance of Central Bank of Chile started to be measured.

<sup>(c)</sup> Since June 2015 it might include instruments of Supranational institutions, agencies and eligible entities with explicit government guarantee with remanent maturity lower than one year.

<sup>(d)</sup> CLP return corresponds to the sum of the percentage change of the CLP/USD exchange rate and the USD return.

Returns for periods of more than one year are compound annualized rates while those for less than a year correspond to the change as seen in the stated period. With a view to meeting high standards of transparency and providing a better assessment of the gains or losses on investments, the Ministry of Finance discloses the fund's return in different time horizons and currencies. With respect to the horizon, it is important to note that, in keeping with the medium- and long-term investment policy, the return assessment should focus on that period, disregarding fluctuations that may occur monthly or quarterly. With regard to returns expressed in different currencies, the return in US dollars allows for an assessment which is more in line with the investment policy given that the fund's resources are wholly invested abroad and in foreign currency. The return in Chilean pesos is also disclosed. This return reflects changes in the peso-dollar exchange rate and, therefore, may experience greater fluctuations. Finally, as with any investment, returns obtained in the past do not guarantee future positive results.
